

WE'VE STOPPED SELLING ROUNDUP

A monarch butterfly with orange and black wings is perched on a cluster of small pink flowers. The background is a soft, out-of-focus green, suggesting a natural habitat. The butterfly is the central focus, with its wings spread slightly.

Did you know we've lost 90% of our monarch population since their peak the '90s?

Monarchs depend on milkweed for food and habitat, and it is being destroyed by the main ingredient in this product, glyphosate.

Want to help? Ask us about safer pest management options and how you can plant milkweed seeds for monarchs to come home to.
